RESUME

Achchutan S

Software Engineer

GitHub github.com/Achchutan-S Website orrery-teal.vercel.app

SUMMARY

Software engineer at Verizon since July 2024, after an internship there. I work on backend services and APIs in Java and Spring Boot, and on front ends in React. Outside work I build Orrery, a static personal platform, and small browser tools.

EXPERIENCE

Software Engineer I, Verizon

Jul 2024 – present

- Work on Spring Boot APIs and their unit tests, written with JUnit and Mockito.
- Explore and integrate existing APIs, including reactive services and GraphQL.
- Contributed to migration work involving a data grid.
- Work on customer journeys, including assisted-sales flows.
- Involved in AI-related projects: lead scoring, OCR, and a voice bot using Twilio and Gemini.

Intern, Verizon

Feb 2024 – Jul 2024

- Worked on a React redesign of a homepage built on existing APIs, including its global navigation and search.
- Demonstrated the work to senior stakeholders.

SELECTED PROJECTS

Orrery

Personal project · orrery-teal.vercel.app

A personal platform of independent experiences on one static site, built with AI coding assistance.

- Typed catalog and release model decide what each environment builds and lists; drafts never reach the production build.
- Build-time checks for leaks, performance budgets, metadata and import boundaries; a strict Content Security Policy.
- Browser tests with Playwright and axe, continuous integration on GitHub Actions, static deployment on Vercel.
- A local Control Center (React, Hono) that previews and writes release changes with optimistic concurrency.

Dev X-Ray

Personal project · devxray-one.vercel.app

Developer tools that run in the browser: format, decode and convert JSON, GraphQL, YAML, SQL, JWTs and more, with no account and no upload.

KawaiUI

Personal project · kawaiui.vercel.app

UI Lab, a museum of interface experiments in rooms: physics toys, motion, WebGL liquids, cursor tricks, games and a synth.

SKILLS

Used at work

Java · Spring Boot · JUnit · Mockito · GraphQL · React

Used in personal projects

TypeScript · Astro · React · Node.js · Hono · Zod · Playwright · GitHub Actions · Vercel

Practising

AI-assisted engineering

EDUCATION

SASTRA University

Computer Science
